PROFESSIONAL SUMMARY

AI/ML Engineer with experience in Generative AI, Agentic AI, and full-stack development using Python, LLMs, and modern AI frameworks. Skilled in building RAG-based applications, multimodal AI systems, REST APIs, and scalable AI workflows using FastAPI, LangChain, OpenCV, and vector databases.

EDUCATION

Acharya Institute of Technology

Bachelor of Engineering in Artificial Intelligence and Machine Learning

2022 – Present

Bengaluru, Karnataka

- **Relevant Coursework:** Machine Learning, Deep Learning, NLP, Computer Vision, DBMS, Data Structures and Algorithms
- **CGPA:** 7.0/10

Alva's Pre-University College

Pre-University Course (PCMB)

2020 – 2022

Moodbidri, Karnataka

- Graduated with 85.83%

EXPERIENCE

Gopafy

Developer Intern

Jun 2026 – Present

Bengaluru, Karnataka

- Developing scalable web applications using modern frontend and backend technologies.
- Building responsive user interfaces, integrating REST APIs, and implementing new application features.
- Collaborating with cross-functional teams using Git/GitHub, participating in code reviews, and resolving production issues.
- Optimizing application performance, improving UI/UX, and contributing to feature deployment in an Agile development environment.

VTU Habba 2026

Full Stack Development Intern

Dec 2025 – May 2026

Bengaluru, Karnataka

- Developed and deployed the official fest management platform .
- Integrated REST APIs for registrations, schedules, and event workflows.
- Collaborated on testing, debugging, deployment, and Git-based version control.

LearnersByte Global Infovision

Generative AI Intern

2025 – Apr 2026

Remote

- Built LLM-powered AI workflows using Python and prompt engineering techniques.
- Developed prototype Agentic AI and RAG-based applications for automation workflows.
- Worked with conversational AI systems, workflow orchestration, and GenAI prototyping.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL

AI/ML: Generative AI, Agentic AI, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Prompt Engineering, TensorFlow, NLP, Computer Vision, AI Workflow Automation

Frameworks & Technologies: React.js, Next.js, Node.js, Express.js, FastAPI, REST APIs, Tailwind CSS, MongoDB, Laravel, php,

Tools & Platforms: Git, GitHub, Vercel, OpenCV, Matplotlib, Jupyter Notebook, Tableau, Power BI, Adobe Illustrator, Canva, Supabase

PROJECTS

Text-to-Floor Plan Generator | Github

Python, TensorFlow, OpenCV, NLP, Matplotlib

- Built an AI-powered system that converts natural language prompts into structured 2D architectural floor plans.
- Implemented Transformer-based NLP pipelines for spatial reasoning and intelligent layout generation.
- Developed preprocessing, visualization, and inference pipelines using TensorFlow and OpenCV.
- Optimized dataset preparation and model inference workflows to improve generation accuracy.

ECHO - Multimodal RAG AI Assistant | Github

Python, LangChain, FastAPI, OpenCV, FAISS, OpenAI API

- Developed a multimodal RAG AI assistant capable of processing text, image, audio, and video inputs.
- Integrated LangChain pipelines with FAISS vector databases for contextual document retrieval and LLM-powered responses.
- Implemented voice assistant functionality using speech-to-text and text-to-speech pipelines.
- Built OpenCV-based image and video processing workflows for multimodal AI interactions.
- Designed FastAPI-based REST APIs for scalable backend communication and AI workflow orchestration.
